

Valley & Farmland Shatin

Shatin is surrounded by hills on three sides, and was named "Shatin Valley".

Since the Ming Dynasty, people have been living in Shatin due to its fertile soil and abundant water supply. Rice farming was the main economic activity. Valley and farmland then formed the special landscape scenery of old Shatin.

The design depicts the change of natural and farmland scenery from dawn to dusk, with nostalgic scenes of the old Shatin in the subway.
