Notes:
1. Dimensions are in millimetres unless otherwise stated.
2. CE/LIGHTING should be consulted on fixing details of light pole.
3. For barrier with planter, the top of the barrier within 1m of the lighting column shall be paved with 50 thick grade 30/20 concrete topping, 50 thick granite setts or selected concrete paving blocks as may be recommended by the landscape architect.
4. Ducts for lighting cables to be provided. Details to be agreed with relevant power companies.
