

Notes:

1. Dimensions are in millimetres.
2. The arrangement is intended to illustrate a possible positioning of common utility duct banks under a footpath of width 3500mm or more. The exact arrangement to be adopted for a particular site depends on various aspects, such as space constraints, underground condition, types/ numbers/ sizes of utilities to be accommodated. The depth of duct banks, the numbers of layers and ducts in each layer, and the orientation of duct banks may be varied appropriately to suit specific requirement.
3. This drawing shall be read in conjunction with Drg. No. H 6156 and H 6158.
